4.WHEN U CLICK ON ANY PARTICULAR SCREEN ANOTHER PAGE OF THAT SAME SCREEN WILL OPEN

5.HERE PHOTS AND VIDEOS OF THAT SCREEN IN THE PACKAGE CHOOSEN

TEXT BOXS TO ENTER DETAILS OF USER

TIME SLOTS TO SELECT

BOOK NOW OPTION

Admin panels:

3 separate accounts with different levels of access
Account 1 – Digital diaries, only digital diaries related booking information can be viewed: includes calendar per day display containing slots and bookings for the day.
Admin can add a slot if customer walks and books. – Does not need to do payment if customer scans UPI code on the spot or pays in cash. Admin must only update the Amount collected and any packages included/ add ons.
Can view all previous bookings, and all future bookings, can remove / edit / modify a booking if needed. Can view amount paid by customer in previous booking.
can block a room or label as under maintaince during specific hours, due to which the customer would be viewing room is unavailable

If admin adds a booking or removes a booking, it will be marked as admin edit / admin addition / admin removal

Account 2 – Staycation
Similar to above, only related to hotels
Main functionality is for the receptionist sitting there to be able to fetch all booking details correctly in a nice manner

Account 3 – Dipesh
Set pricing for all properties -

God mode
Can view and edit all bookings of each business via a drop down menu

Can view detailed insights of all businesses via an insights panel, showing monthly booking information, shows statistics of how many times a particular room was booked, basically should get as much information as possible from our databases in a good graphical representation and tables of revenue and bookings and which villas aren't getting booked etc.

can select date range of insights / year wise / last 6 months / last 3 months / last 1 month

Account 4 – (backdoor for developer)

Super god mode

Can make any changes such as if he adds a booking or removes a booking, it will NOT be marked as admin edit / admin addition / admin removal, can pretend to be customer and live updates to the database will be done.

Any changes done will only be visible to the developer.

(this is strictly for testing and debugging, client will not receive id of this)

Add functionality to download all database content into a zip file and reset the database in case of full storage

Show stats such as how much storage is used
