Dear Sir / Madam,

Greetings from HDFC Bank!

As discussed over the call, please share the below details so we can start the bank testing.

Please note below points:-

1. Merchant need to pass unique customer id for each customer.
2. Do not use UDF2 parameter for additional information as it is blocked for tokenization at our end.
3. Order number and amount on response page it should be similar to as shown on HDFC payment page.
4.The response page should display following data to end user in real-time: Order number , Amount , Success message

Kindly pass the order Id in below format :

1) Should be **less than 21 Characters length**
2) Should not contain any Special Characters
3) Can be Alphanumeric
4) Should be Non-Sequential.

Kindly provide us below details to check and proceed further with security audit.

1. **Step by step screen shots** of the **successful payment process flow** from **home page** to the **final success response page.(Screen shots contain visible URL of your website)**

The response page should display following data to end user in real-time: Order number, Amount , Success message.

2. Also share us **order status API response** to check and verify.**(Refer attached File)**

Kindly refer below points before initiating the Security Audit Process, request your confirmation on the same.

1) Maintain database to store the transaction details/ status (YES/ NO)
2) Services/ payment confirmation to customer/ user will be provided on basis of Database Status (YES/ NO)
3) We perform multiple test transactions in Security Audit process. Kindly prepare the amount/ options/ links/ records for the same (YES/ NO)
4) Login credentials should be available till audit completion (YES/ NO)
5) Do not clear database records till audit completion (YES/ NO)
6) Provided UAT setup should be identical as per the production setup (YES/ NO)

Provided UAT setup should be identical as per the production setup
NOTE: Please note, the testing performed is on UAT environment provided by the merchant.
Only test credentials will be used to perform transactions. Thus, kindly DO NOT HONOR any transaction(Orders created) during testing phase.

7) Implementation of dual inquiry, i.e. "Status API" in response (Mandatory) (YES)
8) Implement attached Audit Checklist for integration process as well as Security Audit process

Request you to please implement the below checks at your end to avoid tampering in the security audit phase.
Find Attached Checklist doc file for description for below key points.

Kindly confirm if you have implemented the below points to proceed ahead with security audit.

Sr No	Key Points	Status (Yes / No)
1	Unique order ID generation -Order ID should be generated uniquely	(Yes / No)
